SUMMARY

Backend engineer focused on scalable Java services.

SKILLS

Java, Spring Boot, REST APIs, SQL, Microservices, Docker, Kafka, PostgreSQL, JUnit, Git

EXPERIENCE

Backend Engineer - PayLoop

January 2022 - Present

- Designed Spring Boot microservices exposing REST APIs for payments, backed by PostgreSQL.

- Introduced Kafka event streaming; reduced settlement latency by 35%.

Software Engineer - Nimbus Systems

06/2020 - 12/2021

- Maintained Java services and wrote JUnit test suites; containerized apps with Docker.

EDUCATION

B.Tech in Computer Science and Engineering, University of Texas, 2016 - 2020

PROJECTS

- Order Management Microservice: Implemented a Java Spring Boot service with REST APIs and PostgreSQL.

- Internal API Gateway: Built a gateway in Java to route traffic across microservices.
